

Bundles reference

This section is still a work-in-progress and is missing several bundles. The plan is to list all bundles here and in most cases to link to their built-in documentation instead of duplicating it here.

In addition to [Symfony Bundles](#), eZ provides a set of bundles out of the box and some optional ones:

- [ElasticSearch Bundle](#)
- [EzLandingPageFieldTypeBundle Configuration](#)
- [EzPublishCoreBundle Configuration](#)
- [Legacy Search Engine Bundle](#)
- [PlatformUI Bundle](#)
- [Recommendation Bundle](#)
- [Repository forms](#)
- [Solr Bundle](#)
