

5.4.4 Release Notes

July 31st 2015

eZ announces the availability of 5.4.4, a maintenance release available for all users of eZ Publish Platform 5.4.

This release changes the coding style used in the kernel of eZ Publish to PSR-2, an official PHP standard. There are no code changes; it doesn't fix any bug and doesn't change behaviour. The change was done to increase interoperability with other PHP projects, and ease backports of bug fixes from the development branch of eZ Platform

Follow the [5.4.x Update Instructions](#) to apply this update to your platforms. If you're migrating from 5.4.3, a simple `composer update ezsystems/ezpublish-kernel` should be sufficient to update.

Micro-releases

Some important fixes are backported to maintenance versions on a case-by-case basis, as micro-releases. Run `composer update ezsystems/ezpublish-kernel` to install them.

- 5.4.4.1 (Sep 9th 2015): fixes an issue with capitalized internationalized uris resolution ([EZP-24737](#)).
- 5.4.4.2 (Sep 21st 2015): fixes a backward incompatible change to the legacy aware routes ([EZP-24726](#)).
- 5.4.4.3 (Sep 22st 2015): Cache clearing with Varnish is not working on many ajax/cronjob based content updates, like update priority in admin ([EZP-24755](#)).

Package updates

Here are the ezsystems packages that have received an update as part of this release:

package	version	prior version
ezsystems/ezpublish-kernel	5.4.4.3	5.4.3

Updates and fixes in this release

Key	Summary	T	Created	Updated
EZP-24726	Regression with <code>legacy_aware_routes</code> configuration		Aug 21, 2015	Oct 20, 2015
EZP-24737	<code>urlalias_iri</code> : German umlaut and other special chars will make the design to fallback to legacy		Aug 26, 2015	Apr 29, 2016
EZP-24755	Cache clear on update priority is not working		Sep 01, 2015	Sep 22, 2015
