

5.4.1 Release Notes

January 16th 2015

eZ announces the availability of 5.4.1, a maintenance release available for all users of eZ Publish Platform 5.4 containing a notable few updates and fixes, most notably the update to Symfony 2.6.

Newer release available

A newer release is available, rendering update instructions here obsolete and non working. Please see [5.4.x Update Instructions](#) for always uptodate instructions for 5.4 releases.

Updating from a previous version of eZ Publish Platform 5.4

These instructions take advantage of [Composer](#) for maintenance updates, so make sure you familiarize yourself with the [Using Composer](#) page. For Upgrading from versions prior to 5.4 look at our [Upgrading from 5.2 to 5.4](#) or [Upgrading from 5.3 to 5.4](#) page.

1. Update to Symfony 2.6

Get the [waste amount](#) of *Developer eXperience* improvements in [Symfony 2.6](#), including eZ specific issues like

[EZF-23489](#) - Symfony 2.6: Make assets install scripts smarter with symlinks **CLOSED** which builds on this work.

Perform the following command to make sure you get Symfony 2.6 in update command below:

```
php -d memory_limit=-1 composer.phar require symfony/symfony:~2.6.1 --no-update
```

2. Updating Composer Packages selectively

With this command you'll only update packages from eZ (and Symfony) that have received updates:

```
php -d memory_limit=-1 composer.phar update --no-dev --prefer-dist  
ezsystems/ezpublish-kernel ezsystems/demobundle ezsystems/ezdemo-ls-extension  
ezsystems/ezpublish-legacy symfony/symfony
```

Note: Add "ezsystems/ezfind-ls" to the parameters to get latest version if you also use this extension.

Package updates

Here are the packages that have received an update as part of this releases:

package	version	prior version
ezsystems/ezpublish-kernel	5.4.1	5.4.0

ezsystems/ezpublish-legacy	5.4.1	5.4.0
ezsystems/demobundle	5.4.1	5.4.0
ezsystems/ezfind	5.4.1	5.4.0
