

PlatformUI Bundle

The PlatformUI bundle provides a web application to manage your content and administrate your eZ Platform instance. It is shipped and set up by default together with eZ Platform. To run PlatformUI, you just have to open [http://\[uri_of_platform\]/ez](http://[uri_of_platform]/ez) in your favorite browser. You should then see the login form and after logging in, you'll be able to start managing your content.

The image shows a login form for eZ Platform. At the top left is the eZ logo, and at the top right is the text "eZ Platform". Below the logo is a green notification bar with a white information icon and the text "You need to login to access this area". Underneath the notification bar are two input fields: "Username" and "Password". At the bottom left of the form is a blue link "Reset password", and at the bottom right is a grey "Login" button.
