

Editing content language versions

Overview

You can create and edit your content in different language versions.

Any Content item you create can have a number of different language versions. You can edit these versions separately.

To enable creating a new language version of a Content item, the language must be configured in the Admin Panel.

Creating new language version of content

To create a new language version of a Content item:

1. Go to the Content mode and open a Content item you would like to edit.
2. Click **Translations** in the Action bar.
3. Click **New Translation**.

The screenshot shows a dark-themed action bar with several options. On the left, there is a section titled 'Existing Translations' with a list containing 'eng-GB' and a '+ New Translation' button below it. On the right, there are icons for 'Minimize', 'Create', 'Edit', 'Move', 'Copy', 'Translations' (with 'eng-GB' below it), and 'Send to Trash'.

4. Select the language of the new language version and **Confirm**.

You can also check the **Base this translation on an existing translation** box and select the basis for the new translation.

Choosing language version to edit

To change the language version you are editing:

1. Go to the Content mode and open a Content item you would like to edit.
2. Click **Edit** in the Action bar.
3. In the upper right corner of the edit screen click **(change)** next to the code of the current language.
4. Select a previously configured language.
