

5.3.7 Release Notes

July 31st 2015

eZ announces the availability of 5.3.7, a maintenance release available for all users of eZ Publish Platform 5.3.

This release changes the coding style used in the kernel of eZ Publish to PSR-2, an official PHP standard. There are no code changes; it doesn't fix any bug and doesn't change behaviour. The change was done to increase interoperability with other PHP projects, and ease backports of bug fixes from the development branch of eZ Platform

Follow the [5.3.x Update Instructions](#) to apply this update to your platforms. If you're migrating from 5.3.6, a simple `composer update ezsystems/ezpublish-kernel` should be sufficient to update.

Package updates

Here are the ezsystems packages that have received an update as part of this releases:

package	version	prior version
ezsystems/ezpublish-kernel	5.3.7	5.3.6
