

Congrats!

Success: you have just built your first website

Now you have created your first website with eZ Platform. The website is simple and efficient.

You learned:

- How to do a quick install of eZ Platform
- How the files in an eZ Platform project are organized
- Where you should put your asset files
- How to param your eZ Platform to use templating
- How to use Twig templates to display the content from your database

WORK IN PROGRESS

This tutorial will evolve quickly, let us know on [Slack](#), [Forums](#) or even comments on this page what Features you want to implement first after this Tutorial. Thank you!
