

# Signals reference

This page references **all available signals** that you can listen to, triggered by ("Public") Repository API in eZ Platform.

For more information, check [SignalSlot documentation](#) and the [cookbook recipe on how to listen to signals](#).

Signals are ordered by Repository service:

- [ContentService](#)
- [ContentTypeService](#)
- [LanguageService](#)
- [LocationService](#)
- [ObjectStateService](#)
- [RoleService](#)
- [SectionService](#)
- [TrashService](#)
- [URLAliasService](#)
- [URLWildcardService](#)
- [UserService](#)
  - [Related topics:](#)

All signals are relative to `eZ\Publish\Core\SignalSlot\Signal` namespace.

## Transactions

As of eZ Publish Platform 5.3.3 and higher signals are sent after transactions are executed, making signals transaction safe.

## ContentService

Signal type	Properties	Triggered by	When
<code>ContentService\AddRelationSignal</code>	<ul style="list-style-type: none"><li>• <code>srcContentId</code> (source contentId, aka referrer)</li><li>• <code>srcVersionNo</code></li><li>• <code>dstContentId</code> (destination contentId, aka target)</li></ul>	<code>ContentService::addRelation()</code>	After
<code>ContentService\AddTranslationInfoSignal</code>	N/A	<code>ContentService::addTranslationInfo()</code>	After
<code>ContentService\CopyContentSignal</code>	<ul style="list-style-type: none"><li>• <code>srcContentId</code> (original content ID)</li><li>• <code>srcVersionNo</code></li><li>• <code>dstContentId</code> (contentId of the copy)</li><li>• <code>dstVersionNo</code></li><li>• <code>dstParentLocationId</code> (locationId where the content has been copied)</li></ul>	<code>ContentService::copyContent()</code>	After
<code>ContentService\CreateContentDraftSignal</code>	<ul style="list-style-type: none"><li>• <code>contentId</code></li><li>• <code>versionNo</code></li><li>• <code>userId</code> (Id of user used to create the draft, or null - current user)</li></ul>	<code>ContentService::createContentDraft()</code>	After
<code>ContentService\CreateContentSignal</code>	<ul style="list-style-type: none"><li>• <code>contentId</code></li><li>• <code>versionNo</code></li></ul>	<code>ContentService::createContent()</code>	After
<code>ContentService\DeleteContentSignal</code>	<ul style="list-style-type: none"><li>• <code>contentId</code></li></ul>	<code>ContentService::deleteContent()</code>	After
<code>ContentService\DeleteRelationSignal</code>	<ul style="list-style-type: none"><li>• <code>srcContentId</code></li><li>• <code>srcVersionNo</code></li><li>• <code>dstContentId</code></li></ul>	<code>ContentService::deleteRelation()</code>	After
<code>ContentService\DeleteVersionSignal</code>	<ul style="list-style-type: none"><li>• <code>contentId</code></li><li>• <code>versionNo</code></li></ul>	<code>ContentService::deleteVersion()</code>	After

ContentService\PublishVersionSignal	<ul style="list-style-type: none"> <li>• contentId</li> <li>• versionNo</li> </ul>	ContentService::publishVersion()	After
ContentService\TranslateVersionSignal	<ul style="list-style-type: none"> <li>• contentId</li> <li>• versionNo</li> <li>• userId</li> </ul>	ContentService::translationVersion()	After
ContentService\UpdateContentMetadataSignal	<ul style="list-style-type: none"> <li>• contentId</li> </ul>	ContentService::updateContentMetadata()	After
ContentService\UpdateContentSignal	<ul style="list-style-type: none"> <li>• contentId</li> <li>• versionNo</li> </ul>	ContentService::updateContent()	After

## ContentTypeService

Signal type	Properties	Triggered by
ContentTypeService\AddFieldDefinitionSignal	<ul style="list-style-type: none"> <li>• contentTypeDraftId</li> </ul>	ContentTypeService::addFieldDefinition()
ContentTypeService\AssignContentTypeGroupSignal	<ul style="list-style-type: none"> <li>• contentTypeId</li> <li>• contentTypeGroupId</li> </ul>	ContentTypeService::assignContentTypeGroup()
ContentTypeService\CopyContentTypeSignal	<ul style="list-style-type: none"> <li>• contentTypeId</li> <li>• userId</li> </ul>	ContentTypeService::copyContentType()
ContentTypeService\CreateContentTypeDraftSignal	<ul style="list-style-type: none"> <li>• contentTypeId</li> </ul>	ContentTypeService::createContentTypeDraft()
ContentTypeService\CreateContentTypeGroupSignal	<ul style="list-style-type: none"> <li>• groupId</li> </ul>	ContentTypeService::createContentTypeGroup()
ContentTypeService\CreateContentTypeSignal	<ul style="list-style-type: none"> <li>• contentTypeId</li> </ul>	ContentTypeService::createContentType()
ContentTypeService\DeleteContentTypeGroupSignal	<ul style="list-style-type: none"> <li>• contentTypeGroupId</li> </ul>	ContentTypeService::deleteContentTypeGroup()
ContentTypeService\DeleteContentTypeSignal	<ul style="list-style-type: none"> <li>• contentTypeId</li> </ul>	ContentTypeService::deleteContentType()
ContentTypeService\PublishContentTypeDraftSignal	<ul style="list-style-type: none"> <li>• contentTypeDraftId</li> </ul>	ContentTypeService::publishContentTypeDraft()
ContentTypeService\RemoveFieldDefinitionSignal	<ul style="list-style-type: none"> <li>• contentTypeDraftId</li> <li>• fieldDefinitionId</li> </ul>	ContentTypeService::removeFieldDefinition()
ContentTypeService\UnassignContentTypeGroupSignal	<ul style="list-style-type: none"> <li>• contentTypeId</li> <li>• contentTypeGroupId</li> </ul>	ContentTypeService::unassignContentTypeGroup()
ContentTypeService\UpdateContentTypeDraftSignal	<ul style="list-style-type: none"> <li>• contentTypeDraftId</li> </ul>	ContentTypeService::updateContentTypeDraft()
ContentTypeService\UpdateContentTypeGroupSignal	<ul style="list-style-type: none"> <li>• contentTypeGroupId</li> </ul>	ContentTypeService::updateContentTypeGroup()
ContentTypeService\UpdateFieldDefinitionSignal	<ul style="list-style-type: none"> <li>• contentTypeDraftId</li> <li>• fieldDefinitionId</li> </ul>	ContentTypeService::updateFieldDefinition()

## LanguageService

Signal type	Properties	Triggered by	When
LanguageService\CreateLanguageSignal	<ul style="list-style-type: none"> <li>• languageId</li> </ul>	LanguageService::createLanguage()	After
LanguageService\DeleteLanguageSignal	<ul style="list-style-type: none"> <li>• languageId</li> </ul>	LanguageService::deleteLanguage()	After
LanguageService\DisableLanguageSignal	<ul style="list-style-type: none"> <li>• languageId</li> </ul>	LanguageService::disableLanguage()	After
LanguageService\EnableLanguageSignal	<ul style="list-style-type: none"> <li>• languageId</li> </ul>	LanguageService::enableLanguage()	After
LanguageService\UpdateLanguageNameSignal	<ul style="list-style-type: none"> <li>• languageId</li> <li>• newName</li> </ul>	LanguageService::updateLanguageName()	After

## LocationService

Signal type	Properties	Triggered by	When
LocationService\CopySubtreeSignal	<ul style="list-style-type: none"> <li>• subtreeId (top locationId of the subtree to be copied)</li> <li>• targetParentLocationId</li> </ul>	LocationService::copySubtree()	After

LocationService\CreateLocationSignal	<ul style="list-style-type: none"> <li>• contentId</li> <li>• locationId</li> </ul>	LocationService::createLocation()	After
LocationService\DeleteLocationSignal	<ul style="list-style-type: none"> <li>• contentId</li> <li>• locationId</li> </ul>	LocationService::deleteLocation()	After
LocationService\HideLocationSignal	<ul style="list-style-type: none"> <li>• contentId</li> <li>• locationId</li> </ul>	LocationService::hideLocation()	After
LocationService\UnhideLocationSignal	<ul style="list-style-type: none"> <li>• contentId</li> <li>• locationId</li> </ul>	LocationService::unhideLocation()	After
LocationService\MoveSubtreeSignal	<ul style="list-style-type: none"> <li>• subtreeId</li> <li>• newParentLocationId</li> </ul>	LocationService::moveSubtree()	After
LocationService\SwapLocationSignal	<ul style="list-style-type: none"> <li>• content1Id</li> <li>• location1Id</li> <li>• content2Id</li> <li>• location2Id</li> </ul>	LocationService::swapLocation()	After
LocationService\UpdateLocationSignal	<ul style="list-style-type: none"> <li>• contentId</li> <li>• locationId</li> </ul>	LocationService::updateLocation()	After

## ObjectStateService

Signal type	Properties	Triggered by
ObjectStateService\CreateObjectStateGroupSignal	<ul style="list-style-type: none"> <li>• objectStateGroupId</li> </ul>	ObjectStateService::createObjectStateGroup()
ObjectStateService\CreateObjectStateSignal	<ul style="list-style-type: none"> <li>• objectStateGroupId</li> <li>• objectStateId</li> </ul>	ObjectStateService::createObjectState()
ObjectStateService\DeleteObjectStateGroupSignal	<ul style="list-style-type: none"> <li>• objectStateGroupId</li> </ul>	ObjectStateService::deleteObjectStateGroup()
ObjectStateService\DeleteObjectStateSignal	<ul style="list-style-type: none"> <li>• objectStateId</li> </ul>	ObjectStateService::deleteObjectState()
ObjectStateService\SetContentStateSignal	<ul style="list-style-type: none"> <li>• contentId</li> <li>• objectStateGroupId</li> <li>• objectStateId</li> </ul>	ObjectStateService::setContentState()
ObjectStateService\SetPriorityOfObjectStateSignal	<ul style="list-style-type: none"> <li>• objectStateId</li> <li>• priority</li> </ul>	ObjectStateService::setPriorityOfObjectState()
ObjectStateService\UpdateObjectStateGroupSignal	<ul style="list-style-type: none"> <li>• objectStateGroupId</li> </ul>	ObjectStateService::updateObjectStateGroup()
ObjectStateService\UpdateObjectStateSignal	<ul style="list-style-type: none"> <li>• objectStateId</li> </ul>	ObjectStateService::updateObjectState()

## RoleService

Signal type	Properties	Triggered by	When
RoleService\AddPolicySignal	<ul style="list-style-type: none"> <li>• roleId</li> <li>• policyId</li> </ul>	RoleService::addPolicy()	After
RoleService\AssignRoleToUserGroupSignal	<ul style="list-style-type: none"> <li>• roleId</li> <li>• userGroupId</li> <li>• roleLimitation</li> </ul>	RoleService::assignRoleToUserGroup()	After
RoleService\AssignRoleToUserSignal	<ul style="list-style-type: none"> <li>• roleId</li> <li>• userId</li> <li>• roleLimitation</li> </ul>	RoleService::assignRoleToUser()	After
RoleService\CreateRoleSignal	<ul style="list-style-type: none"> <li>• roleId</li> </ul>	RoleService::createRole()	After
RoleService\DeleteRoleSignal	<ul style="list-style-type: none"> <li>• roleId</li> </ul>	RoleService::deleteRole()	After
RoleService\RemovePolicySignal	<ul style="list-style-type: none"> <li>• roleId</li> <li>• policyId</li> </ul>	RoleService::removePolicy()	After
RoleService\UnassignRoleFromUserGroupSignal	<ul style="list-style-type: none"> <li>• roleId</li> <li>• userGroupId</li> </ul>	RoleService::unassignRoleFromUserGroup()	After
RoleService\UnassignRoleFromUserSignal	<ul style="list-style-type: none"> <li>• roleId</li> <li>• userId</li> </ul>	RoleService::unassignRoleFromUser()	After

RoleService\UpdatePolicySignal	<ul style="list-style-type: none"> <li>policyId</li> </ul>	RoleService::updatePolicy()	After
RoleService\UpdateRoleSignal	<ul style="list-style-type: none"> <li>roleId</li> </ul>	RoleService::updateRole()	After

## SectionService

Signal type	Properties	Triggered by	When
SectionService\AssignSectionSignal	<ul style="list-style-type: none"> <li>contentId</li> <li>sectionId</li> </ul>	SectionService::assignSection()	After
SectionService\CreateSectionSignal	<ul style="list-style-type: none"> <li>sectionId</li> </ul>	SectionService::createSection()	After
SectionService\DeleteSectionSignal	<ul style="list-style-type: none"> <li>sectionId</li> </ul>	SectionService::deleteSection()	After
SectionService\UpdateSectionSignal	<ul style="list-style-type: none"> <li>sectionId</li> </ul>	SectionService::updateSection()	After

## TrashService

Signal type	Properties	Triggered by	When
TrashService\DeleteTrashItemSignal	<ul style="list-style-type: none"> <li>trashItemId</li> </ul>	TrashService::deleteTrashItem()	After
TrashService\EmptyTrashSignal	N/A	TrashService::emptyTrash()	After
TrashService\RecoverSignal	<ul style="list-style-type: none"> <li>trashItemId</li> <li>newParentLocationId</li> <li>newLocationId</li> </ul>	TrashService::recover()	After
TrashService\TrashSignal	<ul style="list-style-type: none"> <li>locationId</li> </ul>	TrashService::trash()	After

## URLAliasService

Signal type	Properties	Triggered by	When
URLAliasService\CreateGlobalUrlAliasSignal	<ul style="list-style-type: none"> <li>urlAliasId</li> </ul>	URLAliasService::createGlobalUrlAlias()	After
URLAliasService\CreateUrlAliasSignal	<ul style="list-style-type: none"> <li>urlAliasId</li> </ul>	URLAliasService::createUrlAlias()	After
URLAliasService\RemoveAliasesSignal	<ul style="list-style-type: none"> <li>aliasList</li> </ul>	URLAliasService::removeAliases()	After

## URLWildcardService

Signal type	Properties	Triggered by	When
URLWildcardService\CreateSignal	<ul style="list-style-type: none"> <li>urlWildcardId</li> </ul>	URLWildcardService::create()	After
URLWildcardService\RemoveSignal	<ul style="list-style-type: none"> <li>urlWildcardId</li> </ul>	URLWildcardService::remove()	After
URLWildcardService\TranslateSignal	<ul style="list-style-type: none"> <li>url</li> </ul>	URLWildcardService::translate()	After

## UserService

Signal type	Properties	Triggered by	When
UserService\AssignUserToUserGroupSignal	<ul style="list-style-type: none"> <li>userId</li> <li>userGroupId</li> </ul>	UserService::assignUserToUserGroup()	After
UserService\CreateUserGroupSignal	<ul style="list-style-type: none"> <li>userGroupId</li> </ul>	UserService::createUserGroup()	After
UserService\CreateUserSignal	<ul style="list-style-type: none"> <li>userId</li> </ul>	UserService::createUser()	After
UserService\DeleteUserGroupSignal	<ul style="list-style-type: none"> <li>userGroupId</li> </ul>	UserService::deleteUserGroup()	After

UserService\DeleteUserSignal	<ul style="list-style-type: none"> <li>• <code>userId</code></li> </ul>	<code>UserService::deleteUser()</code>	After
UserService\MoveUserGroupSignal	<ul style="list-style-type: none"> <li>• <code>userGroupId</code></li> <li>• <code>newParentId</code></li> </ul>	<code>UserService::moveUserGroup()</code>	After
UserService\UnAssignUserFromUserGroupSignal	<ul style="list-style-type: none"> <li>• <code>userId</code></li> <li>• <code>userGroupId</code></li> </ul>	<code>UserService::unAssignUserFromUserGroup()</code>	After
UserService\UpdateUserGroupSignal	<ul style="list-style-type: none"> <li>• <code>userGroupId</code></li> </ul>	<code>UserService::updateUserGroup()</code>	After
UserService\UpdateUserSignal	<ul style="list-style-type: none"> <li>• <code>userId</code></li> </ul>	<code>UserService::updateUser()</code>	After
