

Deleting content - Landing Page

Overview

At any time you can remove existing content from your website.

Removing content does not actually delete it entirely. Instead, removed content is archived and can be restored later when needed.

In this topic

- Removing content in Page mode
- Managing Trash

Removing content in Page mode

16.04 OR LATER

To remove existing content:

1. Go to the Page mode.
2. Go to the page you would like to delete.
3. Click **Options** in the Studio toolbar and select **Send to Trash**.

A dialog box appears, asking you to confirm deleting the content.

4. Click **Send to Trash**.

If you remove a Content item that has children (other content under it in the content tree), both this item and the children will be moved to Trash.

Managing Trash

You can view Content items in Trash, restore them or delete them permanently from the Content mode. See [Deleting content](#) for more information.
