

Managing languages

Overview

You can add available languages in the Admin Panel.

You can create your Content in a number of different language versions.

Languages which will be available throughout the website are configured in the Admin Panel.

When creating and editing Content items, they can be localized for different languages. In this case, you'll have a separate version of the Content item for each language.

Adding languages to your website

To add a new language to your website:

- In the Navigation hub click **Admin panel**.
- Select **Languages**.

A list of all languages already configured in the system appears.

Language name	Language code	Language ID	Enabled
English (United Kingdom)	eng-GB	2	<input checked="" type="checkbox"/>
French	fre-FR	4	<input checked="" type="checkbox"/>

+ Create a new language

Click language name or code to view the details of the language.

- Click **Create a new language**.
- Enter a name and code for the new language.
- Check the **Enabled** box if you want the language to be available from the start.
- Confirm with **Save**.

Modifying languages

Click **Edit** to modify the details of an already configured language.

Click **Delete** to remove an existing language from the system.
