- [Usage](#)
- [Customization](#)

Version compatibility

This Twig helper is available as of eZ Publish **5.3 / 2014.05**

Description

`ez_legacy_render_js()` is a Twig helper which adds javascript (code and files) configured in ezjscore to legacy callback modules.

It returns a HTML code to insert in the `<head>` of your page.

Prototype and Arguments

`ez_legacy_render_js()`

Usage

Just insert the function where the HTML code needs to be inserted.

```
<head>
  <!-- code of your head -->

  {# Adds javascript code and files from ezjscore #}
  {{ ez_legacy_render_js() }}

  <!-- code of your head -->
</head>
```

Customization

You can customize the display of the function by overriding the template used in the following parameter:
`ezpublish_legacy.twig.extension.template.js`
