ez_legacy_render_css

- Description
- Prototype and Arguments
- Usage
- Customization

Version compatibility
This Twig helper is available as of eZ Publish **5.3 / 2014.05**

Description

`ez_legacy_render_css()` is a Twig helper which adds css (code and files) configured in ezjscore to legacy callback modules.

It returns a HTML code to insert in the <head> of your page.

Prototype and Arguments

ez_legacy_render_cs()

Usage

Just insert the function where the HTML code needs to be inserted.

```
<head>
 <!-- code of your head -->

 {# Adds css code and files from ezjscore #}
 {{ ez_legacy_render_css() }}

 <!-- code of your head -->
</head>
```

Customization

You can customize the display of the function by overriding the template used in the following parameter:
ezpublish_legacy.twig.extension.template.css
