Next Steps: Follow a Tutorial Path

With your system configured and eZ Platform up and running, you're ready to dive in and follow a tutorial.

You may want to start by Building a Bicycle Route Tracker in eZ Platform, in which you'll learn how to build an eZ Platform website from the ground up.

All available tutorials:

- Building a Bicycle Route Tracker in eZ Platform — This tutorial is a step-by-step guide to building an eZ Platform website from the ground up.
- eZ Enterprise Beginner Tutorial - It's a Dog's World — This tutorial will guide you through the process of making and customizing a front page for your website. For this purpose we will use a feature of eZ Platform Enterprise Edition called Landing Page.
- Creating a Tweet Field Type — This tutorial aims at covering the creation and development of a custom eZ Platform Field Type https://doc.ez.no/display/DEVELOPER/Field+Types+reference.
- Extending PlatformUI with new navigation — This tutorial aims at providing a step-by-step guide on how to extend the JavaScript application provided by the PlatformUI bundle https://github.com/ezsystems/PlatformUIBundle.
